Pioneering capacity

Reduced power consumption

Cool and quiet

WD Caviar Green SATA hard drives reduce power consumption compared to standard desktop drives, offer best-in-class acoustics and operating temperature and are available with capacities up to 3 TB.

WD Caviar Green

Power-saving Hard Drives

Product Features

Massive capacity

WD Caviar Green SATA drives deliver up to 3 TBs of storage on a single drive.

Reduced power consumption

WD has reduced power consumption making it possible for our energy-conscious customers to build systems with higher capacities and the right balance of system performance, ensured reliability, and energy conservation.

Cool and quiet

Drives with WD GreenPower Technology™ yield lower operating temperatures for increased reliability and low acoustics for ultra-quiet PCs and external drives.

IntelliPower™

A fine-tuned balance of spin speed, transfer rate, and caching algorithms designed to deliver both significant power savings and solid performance.

IntelliSeek™

Calculates optimum seek speeds to lower power consumption, noise, and vibration.

NoTouch™ ramp load technology

The recording head never touches the disk media ensuring better drive protection in transit as well as significantly less wear to the recording head and media.

Advanced Format (AF)

Technology being adopted by WD and other drive manufacturers as one of multiple ways to continue growing hard drive capacities. AF is a more efficient media format that enables increased areal densities. (WDxxEZRSDDL, WDxxEARS and WDxxxAARS models)

As used for storage capacity, one megabyte (MB) = one million bytes, one gigabyte (GB) = one billion bytes, and one terabyte (TB) = one trillion bytes. Total accessible capacity varies depending on operating environment. As used for transfer rate or interface, megabyte per second (MB/s) = one million bytes per second, and gigabit per second (Gb/s) = one billion bits per second.
