Having gone through over 600 days of reading, Übungen, paperwork, exams and fear of VRS, Complexity Theory, Compiler amongst host of others. We are finally here. On behalf of my fellow graduates, I greet

- Dr. Stefan Löhrke,
- Members of the University Management
- Esteemed Professors,
- Deans,
- Faculties,
- ISGS,
- Families,
- Friends and Kaiserslautern.

Today marks another milestone in our lives, on the journey of achieving our hopes, dreams and aspirations.

Firstly, on behalf of me and my fellow graduates, I will like to express our profound gratitude to TUK for the excellent education we have received; As foreign students, we very much, thank the entire management and academia of TUK, the Government of Germany and the people of the country for the support, encouragement and knowledge bestowed upon us.

My fellow graduates, the journey so far as been an amazing one filled with so much hard-work, fun memories and a knowledge accumulating experience. Right from the 8:15 a.m classes, to the Compiler exercise weekend sleepovers, midnight problem solving session of semester projects down to the never ending VRS exercises, we have worked hard to be where we are today.

As we thread the world, we must individually stand as good TUK ambassadors and positively impact the environment wherever any individual finds him/herself, we owe this much to the
hardworking staffs of TUK and ISGS. I see every member of the graduating set of 2017 and 2018 making great achievements.

TUK has trained us to be higher achievers, ISGS has polished us and prepared us for the future with excellent support! right from the very first time we arrived in Kaiserslautern, all through our duration of study, right till this very moment. For this support and possibility to be a member of the ISGS Family and Network, I want to say. Thank you!.

Now! It is up to us to make them proud of their efforts over us these past months.

As a great man, Henry Ford once said:
"Whether you think you can, or you think you can't; you're right"

Thirdly, as opportuned at this occasion, I must give credence! to German Educational System which developed along the country’s strong philosophy and tradition. Its influence to modern world cannot be over-emphasized.

All my life, I have prayed, dreamed and hoped for an international learning experience such as this, I never for once thought it possible to achieve such, without incurring heavy student loans, or debts. From the depths of my heart and soul, I say to Bundesrepublik Deutschland, Thank you! very much. I will forever be grateful for this opportunity.

Lastly, my fellow graduates, we came into the city of Kaiserslautern from different countries, continents, backgrounds, cultures, religious believes, lifestyle, skin colour, hair colour but today, we finish as a team! Products formed by TUK and ISGS, Graduates of class 2017 / 2018. We are leaving here stronger, smarter, more intelligent than we came in. Celebrate your accomplishment, Enjoy the moment, go out there!

And “Do great things”!

Thank you.
